WORK EXPERIENCE

Cloudera

Jun 2022 -
Aug 2023

Software Engineer Intern

[Python, Java, Spring, Rust, Jenkins, Ansible]

I automated the daily tasks of the NiFi development teams, specializing in infrastructure and platform development.

This involved contributing automated solutions for creating hotfixes, managing dependencies, detecting errors, and creating clusters. I also migrated and merged various source codes into a single ansible powered library.

Simonyi Károly

College for
Advanced Studies

Member, Web Developer

[TypeScript, Nest, React, Open API, Tailwind CSS, Prisma ORM]

We take ideas and turn them into web applications used by thousands of users. We are using some of the latest TypeScript-based technologies. I joined as an outsider because I was fascinated by what they can achieve. I am a project manager and architect on a new administration-oriented project.

Móra Ferenc

College for
Advanced Studies

Network System Administrator

[OpenWrt, Proxmox, Mikrotik, Cephfs, VLAN, Prometheus, Grafana]

We provide cutting-edge stability and speeds. I possess expertise in all aspects of maintaining the dormitory's redundant computer network.

EDUCATION

Computer Science BSc

Sept 2021 –
Jun 2024

University of Szeged

I have primarily pursued data science courses. I wrote my thesis on load balancing of WiFi networks using assisted roaming.

LANGUAGE PROFICIENCY

English

Proficient

Certified at B2 level in 2018 and I have only improved since then. I participated in an Erasmus+ exchange program in 2023.

I have strong professional language skills.
