PROFILE

My name is Tamás. I am a graduating computer science student at the university of Szeged.

I have strong experience in NodeJS web backend development, software development automation and computer networks.
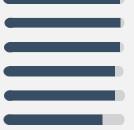

TOP SKILLS

- Typescript, NodeJS
- Linux
- Python
- Java
- Rust
- Automation

PERSONAL SKILLS

- Quick learning
- Adaptability
- Time management
- Problem solving
- Open to new things

WORK EXPERIENCE

Cloudera
Jun 2022 - Aug 2023

Software Engineer Intern
I automated the work of the NiFi development teams.
I implemented solutions for testing, hotfixing, dependency management, error detection and reporting.
I migrated and integrated various source codes into an Ansible based mono repository.
I gained experience with Python, Java, Rust, Ansible, Spring Boot, Maven and Jenkins.

Simonyi Károly College for advanced studies

Member, KIR-DEV
I joined as an outsider because I was fascinated by what they can achieve.

Now, I as a member of the web development team we create web applications used by 1000+ people, using the latest JavaScript-based technologies such as nestjs, prisma orm and react.

Móra Ferenc College for advanced studies

Network System Administrator
I have experience in every element of the dormitory's HA redundant computer network. We use OpenWrt, Proxmox, Mikrotik RouterOS, Cephfs, Network Segregation and automated reporting to provide cutting-edge stability and speeds despite a low budget.

EDUCATION

Computer Science BS
Sept 2021 – Jun 2024

University of Szeged
I wrote my thesis on load balancing of WiFi networks using assisted roaming.

I mostly did data-science courses.

LANGUAGE PROFICIENCY

English
Intermediate / B2 level

BME Examination Centre
Certified at B2 level in 2018 and I have only improved since then. I participated in an Erasmus+ exchange program in 2023.

I have strong professional language skills.
